

Name _____

Solar System Travel Guide Project

You have just acquired a job with Solar System Cruise Lines, the #1 luxury celestial line! Your job is to create a brochure/book that gives planet specifics to possible cruise clients. You must include statistics of each planet:

1. Atmospheric features of each planet
2. Size of the planet and how that size compares to Earth
3. Distance of planet from the sun (km or AU)
4. Planet surface features

Because vacationing families want to get the most for their money, you must also include:

1. 3 fun facts about the planet or 3 things to see while they are there
2. Illustration of the planet and label it
3. On the front cover, illustrate the only planet that can support life AND give 3 reasons why it can support life.

Remember to design a neat and organized brochure because you're selling the trip of a lifetime!
